PAYMENT

We accept all forms of payment such as credit cards, debit cards, checks, health saving plans, checks and of course cash.

The reason I charge \$20 verses \$25 or more is because \$20 is less than most insurance co-pays and every ATM spits out 20 dollar bills. If I charged \$25, I would have to be breaking bills and counting change so \$20 for me is just simple and easy. Besides, The difference between a hot and a pig is a pig gets fat - don't be greedy!

I think it would be to your advantage on hiring a CPA, instead of doing your bookkeeping yourself.

If you decide to incorporate this into your business, which I recommend, your CPA can do this as well.

Card services are inexpensive and affordable. Be as broad as possible with this model.
