HIRING A CPA

I think it would be to your advantage on hiring a CPA, instead of doing your bookkeeping yourself. Every month I take my monthly bank statement as well as my check stubs and credit card statements to my CPA and she organizes all my expenses and calculates my monthly finances. She also files all my monthly 941 employment taxes, all this from \$90 to \$150 a month pending on how much she has to do. If you decide to incorporate your business, which I recommend, your CPA can do this as well. I believe hiring a CPA from the beginning will be an investment you will not regret.
