# VACATIONS

Before I created this business model, I did the traditional management practice which involved corrective care, prepaid plans, insurance, Medicare, auto/work-related Injuries, etc. I literally had taken only one full week of vacation in the first 15 years of my practice. I took small trips on a Thursday, Friday, Saturday, Sunday, and Monday, but I always worked at least 3 days a week regardless. It seemed like every time I left the practice, my business would go south.

This business model allows me to take three to four weeks off a year for vacations without hurting my practice volume at all - it's crazy! The Monday I get back, I have people lined out the door.

To accomplish this a week before I close for vacation, I send out an email notifying my patients that I will be out. Get ready, because that email will cause a panic and you'll have patients out the door all day long. So along with an email notification, I change the voice mail, post it on my face book page, and put a note on the door and off I go! Family's all you've got and time is all you can give so take a break and enjoy your family!

Family's all you've got and time is all you can give, take a break and enjoy your family!
